

WHY HAND2HAND?

As we can see many people give away items that they don't use anymore, but they have a hard time finding people in need. We are here to match people's needs with the given items.

OUR GOAL

Our aim is to let people to reach the items and products they need easily without paying, and at the same time, encourage people who have products that they do not need anymore to give them rather than throw them away.

HOW IT WORKS ?

The searching tool is prioritized according to location. If there's something you're looking for, the nearest location's items will pop up first. Otherwise, you can search by town, city, or region. In this context, products are quickly supplied to those in need.

USE OF THE SYSTEM

Users will create an account as givers/takers, open a give/receive post, communicate, choose the delivery way, and send/receive items. All available items will be listed on the main page.

HOW TO GIVE / RECEIVE ITEMS ?

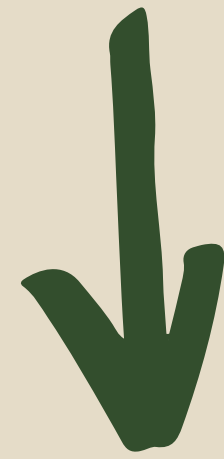

Users can send the items with the contracted couriers, or they can also drop them off to be picked up from the contracted shops and stores.
